

STRATEGIE DI CALCOLO ORALE

Per calcolare meglio usa il disegno delle palline e raggiungi prima la decina. Ti ricordi gli amici del 10?

$$8 + 6 = 14 \longleftrightarrow (8 + 2) + 4 = 14$$

$$3 + 9 = \underline{\quad} \longleftrightarrow \underline{\hspace{2cm}}$$

$$4 + 7 = \underline{\quad} \longleftrightarrow \underline{\hspace{2cm}}$$

$$5 + 8 = \underline{\quad} \longleftrightarrow \underline{\hspace{2cm}}$$

$$9 + 5 = \underline{\quad} \longleftrightarrow \underline{\hspace{2cm}}$$

$$6 + 7 = \underline{\quad} \longleftrightarrow \underline{\hspace{2cm}}$$

$$8 + 9 = \underline{\quad} \longleftrightarrow \underline{\hspace{2cm}}$$
