

STRATEGIE DI CALCOLO ORALE

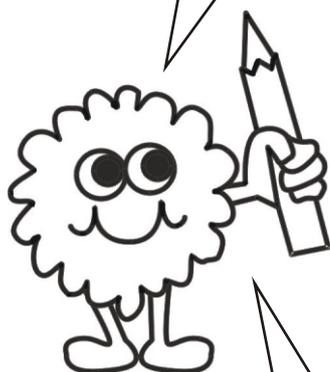

Per calcolare più velocemente raggiungi prima la decina.

Osserva gli esempi e scrivi i numeri che mancano.

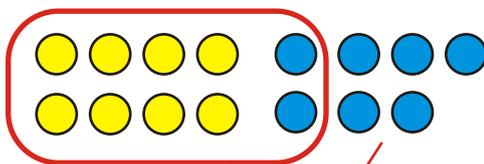

Ti ricordi gli amici del 10?

$$8 + 7 = ?$$

Raggiungo il 10. 8 è amico di 2 per fare 10!

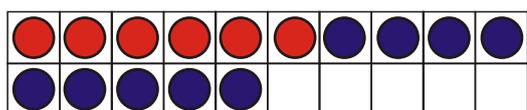

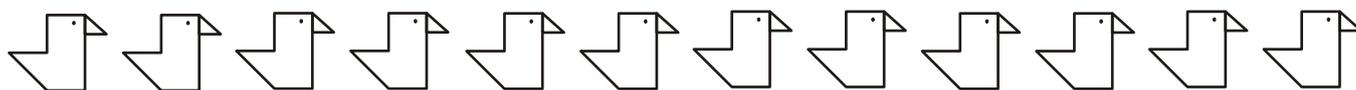

Aggiungo ancora il 5 che è l'amico di 2 per fare 7!

$$8 + 7 = 10 + 5 = 15$$

$$2 \quad 5$$

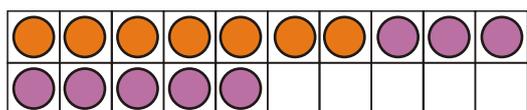

$$10 + 5 = 15$$

$$6 + 9 = \dots\dots\dots$$

$$4 \quad 5$$

$$10 + 5 = \dots\dots$$

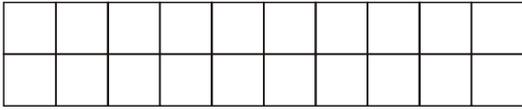

$$7 + 6 = \dots\dots\dots$$

$$3 \quad \dots\dots$$

$$10 + \dots\dots = \dots\dots$$

CALCOLO ORALE

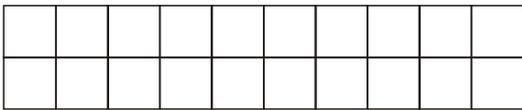

Calcola aiutandoti con il disegno delle palline.
Ricordati di raggiungere sempre la decina.

$$8 + 5 = \dots\dots\dots$$

.....

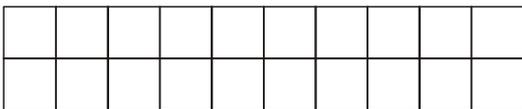

$$10 + \dots = \dots\dots$$

$$3 + 8 = \dots\dots\dots$$

.....

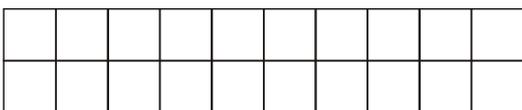

$$10 + \dots = \dots\dots$$

$$8 + 4 = \dots\dots\dots$$

.....

$$10 + \dots = \dots\dots$$

$$9 + 8 = \dots\dots\dots$$

.....

$$10 + \dots = \dots\dots$$
